REPORT OF BOARD OF HEALTH.

During the past year only one case of diphtheria and one case of scarlet fever have appeared. In both cases every precaution was taken to prevent the spread of the disease, and the houses have been thoroughly fumigated after the cases recovered. In one instance, as an extra precaution, the school room where the child attended school was also fumigated.

Measles have been very numerous during the fall and winter, probably more than a hundred cases having developed during that time.

Several cases of nuisance have been reported to the board and the parties concerned have been notified to remove same, which has been done without trouble in every instance.

Samples of water have been sent to the state laboratory of hygiene for analysis, and water which was thought to be pure was found to be polluted and unfit for use, while other water which appeared bad was found to be good.

Our water at the town hall was analyzed and found to contain nothing injurious.

REPORT OF SUPERINTENDENT OF SCHOOLS

FOR THE YEAR 1905-1906.

To the School Board of Fitzwilliam:

I have the honor to submit my fourth report as superintendent of schools.

A recent decision of the supreme court is interpreted by the attorney-general to mean that the money paid for the tuition of high school pupils should be raised in the school meeting rather than in the town meeting; and that the school board would render themselves liable to a fine if they paid it out of "school money." Consequently a special article has been put into the warrant for this purpose. If all of this money is not needed next year, it can be allowed to accumulate as a fund for this purpose.

Two years ago the length of our school year was considerably increased. Conditions have been unfavorable for getting as good attendance as was expected. Last winter was very severe and this winter there has been an unusual amount of sickness. The report shows considerable difference in the number of weeks in the different schools. This is accounted for by the great falling off of attendance in those schools which show a shorter winter term. In the case of Bowkerville we were so unfortunate as to lose two teachers during the fall term. It seemed hardly desirable to employ a new teacher for the few weeks which remained in the winter term. This accounts for this school having so short a time relatively. By beginning earlier in the spring those schools that have had their year shortened can make up part of the time. It should be noted that part of this year's surplus in money will be needed for this purpose.

Many parents fail to realize the prime importance of regularity of attendance. The teacher cannot help the pupil unless he at least attends. By staying out, children fall behind the others, become discouraged, and fail in their studies. School work should be taken more seriously by parents and children.

Respectfully submitted,

HENRY B. STEARNS.
